NON-CONTACT SPEED & LENGTH MEASUREMENT

InteliSENS™ SL & SLR Series

AUTOMATIC DIRECTION DETECTION
MEASURE DOWN TO ZERO SPEED
HIGH ACCURACY, NON-CONTACT, LASER DOPPLER MEASUREMENT
INTRODUCTION

- The IntelliSens™ SL and SLR Series directly replaces traditional, high-maintenance, problematic contact wheel and rollers type devices, with accurate “state-of-the-art” laser Doppler technology.

- Automatic Direction Detection, and measurement down to Zero Speed, mean the SLR gauge counts up, or counts down, so if your line reverses, final length measurement will still be accurate to 0.05%

- SL and SLR gauges are extremely easy to install, integrate and use. Production processes, such as wire, cable, web products, wovens, non-wovens, paper, plastic film, tapes, building material, floorings and labelling are all measured using the laser Doppler method.

- Accurate speed and length measurement reduces scrap, increases uptime and improves material yield, through elimination of product “Give Away” or “Short Length” claims.

NON-CONTACT MEASUREMENT

- Zero Speed: Measures Speeds Down to Zero*
- Direction Detection: Auto count Up or Down*
- Accurate: Better than 0.05%.
- Repeatability: Better than 0.02%
- Non-Contact: No Slippage, No Marking, No Wear
- Industrial Design: Harsh Factory Environment
- Easy Integration: Modern Communications
- Reduce Downtime: Permanently Calibrated
- Reliable: IntelliSens™ Technology 24/7
- Excellent Value: Low Cost of Ownership

MEASUREMENT MODES

- Pipe
- Tube
- Paper
- Foil
- Film
- Wire
- Cable
- Labelling
- Tapes
- Packaging
- Floor Coverings
- Wovens
- Non-Wovens
- Building Materials
- Steel
- Aluminium
- Other metals

CONNECT

Integration has never been easier.
Select from Standard Communications or choose from a wide range of factory fitted Optional Communications to meet your needs.
Connect to your existing indicator / display devices, PLC or PC.

Standard communications

CANBUS RS232 RS422 RS485 IP TCP/UDP

Optional communications

Bluetooth Analogue Output Quadrature Pulse Output Serial Synchronous Interface

DISPLAY and RECORD

The SiDI Range of Display Interfaces are the perfect match for your InteliSENS™ SL and SLR Series Non-Contact Speed & Length gauge. From a simple LED display, fully featured VFD display, configure, diagnose and a large oversized LED display.

SiDI AiG1 SiDI AiG2 SiDI AiG3

Monitor and control the SLR gauge on your PC or your mobile phone.
Log measurements at the touch of a button.

PCIS software: interface, display and logging
PCIS on mobile phone via Bluetooth
TECHNOLOGY

Proton Products’ expertise in Optical Design combined with the latest “Super Fast” Field Programmable Gate Array (FPGA) processors, Fast Fourier (FFT) and Auto-Correlation software techniques have created the InteliSENS™ SL and SLR Series of highly accurate, repeatable and dependable gauges.

LASER DOPPLER

**PRINCIPLE OF OPERATION**

\[ d = \frac{\lambda}{2\sin \kappa} \]

- Fringe spacing is a function of laser wavelength and beam angle.

\[ f \propto \frac{v}{d} \]

- Doppler frequency is proportional to speed and inversely proportional to fringe spacing.

\[ L = \int_0^T dv/dt \]

- Speed is integrated to measure length.

**LASER BEAMS: SIDE VIEW**

**LASER DOPPLER PATTERN**

Every gauge is factory calibrated on UKAS certified equipment. The gauges are then subjected to temperature cycling tests before final QC testing. Each gauge is supplied with a unique calibration certificate identified by the gauge serial number. Typical Factory Calibration Accuracy is between 0.02% and 0.05%.

The SL and SLR Series contains a Class 3B laser diode and complies with EN60825-1:2001, and has the following safety measures in compliance with the Bureau of Radiological Health Class 3B:

- Interlock capability for remote shut-off: laser enable electrical contact
- Laser beam blocking device: mechanical shutter operated by switch on gauge case
- Delayed laser startup: LED indicator light on before laser reaches full power
- Laser indicator light
- Keyswitch to switch laser on and off

Measuring the speed and length of the product is one thing, but getting the information to your host system depends on the delivery of the data.

The InteliSENS™ SL and SLR Series delivers a maximum standard pulse output frequency of 1 MHz.

**SUPER-FAST OUTPUTS**

**CALIBRATION & CERTIFICATION**

**LASER SAFETY**

The SL and SLR Series contains a Class 3B laser diode and complies with EN60825-1:2001, and has the following safety measures in compliance with the Bureau of Radiological Health Class 3B:

- Interlock capability for remote shut-off: laser enable electrical contact

#### InteliSENS™ SLR Series

- **Accuracy**: Better than 0.05%
- **Repeatability**: Better than 0.02%
- **Acceleration Rate**: >500ms⁻¹
- **Measurement Update Rate**: 40µs (0.04ms) [1 measurement = 1 scan]
- **Direction Detection**: Automatic
- **Power Requirement**: 15 - 25 Vdc, 20 Watts
- **Protection Rating**: IP67
- **Temperature Range**: 5° ~ 40°C (41° ~ 104°F)
- **Gauge Dimensions**: LxWxH 220 x 140 x 90 mm (8.7” x 5.5” x 3.5”)
- **Gauge Weight**: 3 kg (6.6 lbs)
- **Laser Spot Size**: 4mm (0.16") diameter
- **Units of Speed**: m/min, ft/min
- **Units of Length**: m, ft, yd
- **5x Digital Inputs**: 2 Fixed: Laser Enable, Optical Shutter Enable
- 3 Programmable: Reverse direction, Length hold, Display hold, Speed Hold, Reset (length or reel number), End of reel. Max Input 24Vdc
- **3x Relay Outputs**: Volt-Free Contact; Max. Voltage 50Vdc 0.5A
  - Gauge OK, Gauge Measuring, Laser On, Laser at Temp, Shutter Open,
  - (Status Indicators) Preset Length 1, Preset Length 2
- **Serial I/O**: Selectable RS232, RS485, RS422: Speed, Length, GR, (Status Indicators), Bluetooth
- **CANBUS**: Connects to Proton Products range of SIDI AiG2 & AiG3 Indicators. Can be used to supply power to gauge head.

#### InteliSENS™ SLR Series

- **Analogue Output**: 0 - 10Vdc Scaleable output. Output based on Speed or on Good Readings
- **3x Pulse Outputs**: Opto-Isolated differential outputs. Configurable as Quadrature or Index.
  - Default output 5V or user input to 24Vdc max. Max. Pulse Output up to 1MHz
- **Additional Protocols**: DeviceNet, Modbus, Profinbus, Profinet, EtherNet, Industrial Protocol, and SSI available
